Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 7-9, 13-15 and 19-21, drawn to a method for displaying a web page that automatically determines a customer level for the requester of said web page and displays a corresponding version of said web page, classified in Class 715, Subclass 511.
- II. Claims 4-6, 10-12, 16-18 and 22-24, drawn to a method for displaying a web page that allows a user to change the configuration of said web page, classified in Class 715, Subclass 517.

The inventions are distinct, each from the other because Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case, the different inventions are unrelated because they are not disclosed as capable of use together in the Specification of the present application, and the inventions have different modes of operation, different functions, or different effects in that Group I automatically displays a web page based on the customer level for the requester of the web page and does not permit the requester to amend the web page whereas Group II displays the web page stored for each requester and allows the requester to amend the configuration of the web page.

Art Unit: 2179

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Steven I. Weisburd on 25 October 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
